

## Chemistry Laboratory Safety Agreement

Whenever I am working in the laboratory, I will follow the recommended laboratory safety practices and take the following precautions:

1. Wear approved splash proof goggles at all times.
2. Know the locations and operations of all safety equipment.
3. Never work alone in the laboratory.
4. Do only the assigned experiment.
5. Wear clothing that will provide maximum protection.
6. Place items such as purses, backpacks, sweaters, coats, scarves, and extra books in designated areas.
7. Never eat, drink, smoke, or chew in the laboratory. and never apply makeup in the laboratory.
8. Discard materials as directed by my laboratory instructor.
9. Help keep the laboratory clean and uncluttered.
10. Use a fume hood when so directed.
11. Use good judgment and care when working in the laboratory.
12. Avoid touching hot objects.
13. Read reagent bottle and container labels to make certain that the vessels contain the reagents specified for the experiment, and to learn of any hazards associated with the reagents.
14. Wash my hands thoroughly before leaving the laboratory.
15. Immediately report all spills and injuries, no matter how minor, to my laboratory instructor.

-----

I have carefully read the recommended safety practices and precautions listed in this agreement. I understand their importance in preserving the safety of everyone in the laboratory. I recognize my responsibility to follow these practices and precautions while I am in the laboratory.
