

"A state-of-the-art addition to the field of business continuity management and allied subjects.... provides a firm foundation for novices and a valuable reference for experienced professionals."

--Mayer Nudell, CSC, Adjunct Professor of Security Management, Webster University

"As Technical Director at the Business Continuity Institute, one of my specific duties is to encourage the inclusion of BCM as a serious topic in graduate and masters business programs. I believe this book will form a cornerstone of many such programs."

--Lyndon Bird, FCBI, Technical Director and board member, The Business Continuity Institute

"An executive, student, or practitioner who absorbs the content of this book will be better prepared to function in a field where preparedness is absolutely essential. Keep this book. It will serve you well in your education and practice."

--Thomas D. Phelan, PhD, Program Director, Emergency and Disaster Management and Fire Science at American Public University System; Founding Member, U.S. Department of Homeland Security

"The authors....bring the subject to life with rich teaching and learning features, making it an essential read for students and practitioners alike."

--Phil Kelly, DBA, FHEA, FIRM, Senior Lecturer, Liverpool (UK) Business School and Lead Examiner, Risk Decisions, Institute of Risk Management (IRM)

ENDORSED BY

**Awarded Best Book of the Year
by the International Institute for Advanced
Studies in Systems Research and Cybernetics**

State of the Art Exposition of the Twin Disciplines of Business Continuity and Risk Management

In their new book Dr. Kurt J. Engemann and Douglas M. Henderson present a readable blend of academic principles and real-world applications in showing how to integrate and implement risk management with the newer and now globally accepted discipline of business continuity management.

The book is designed for college and executive management courses, as well as practitioners desiring a distillation of the most current practices around the globe. Features include:

- **Flexible, modular design that allows you to customize a self-study plan:** Ten chapters cover fundamental principles and practices; three chapters give greater detail on Information Technology and Emergency Management for those focusing in these areas; and four chapters delve into Risk Modeling for those seeking a foundation in the statistical underpinnings of risk management.
- **Comprehensive training package for professional development classes, including instructor materials:** test bank, syllabi, PowerPoint slides, and sample solutions to case studies, discussions, and end-of-chapter questions. Two of the case studies are integrated throughout the text to give managers experience in applying chapter principles to a service company and a manufacturer.
- **Holistic coverage of two interfacing fields: Business Continuity**, which tends to deal with consequences, and **Risk Management**, which tends to be preventative. Both The Business Continuity Institute (BCI) and The Institute of Risk Management (IRM) have endorsed the book.
- **Quick desk reference for your BCM team** offering a blend of academic principles and practical applications—an effective tool for grounding interdepartmental teams learning to develop and maintain BC plans.

Kurt J. Engemann, PhD, CBCP, is the Director of the Center for Business Continuity and Risk Management and Professor of Information Systems in the Hagan School of Business at Iona College. He is editor-in-chief of the *International Journal of Business Continuity and Risk Management*.

Douglas M. Henderson, FSA, CBCP, is a consultant with more than 20 years of experience in all areas of Business Continuity and Emergency Response Management. He is also author of a book and several Business Continuity templates.

Business Continuity and Risk Management: *Essentials of Organizational Resilience*

By Kurt J. Engemann, PhD, CBCP and Douglas M. Henderson, FSA, CBCP

BRIEF TABLE OF CONTENTS

Section I. Introduction

Chapter I. Fundamentals of Business Continuity Management
Chapter II. Business Continuity Management Organization
Chapter III. Business Impact Analysis
Chapter IV. Risk Assessment
Chapter V. Strategy Development
Chapter VI. Disaster Recovery for Information Technology
Chapter VII. Information Systems Security

Section II. Implementation

Chapter VIII. Emergency Response
Chapter IX. Enhancing Coordination with External Agencies
Chapter X. Business Continuity Plan
Chapter XI. Crisis Communication
Chapter XII. Crisis Information Management Systems

Section III. Maintenance

Chapter XIII. Sustaining Organizational Resilience

Section IV. Risk Modeling

Chapter XIV. Fundamentals of Probability and Statistics
Chapter XV. Statistical Applications in Risk Management
Chapter XVI. Simulation Modeling and Supply Chain Risk
Chapter XVII. Risk and Decision Modeling

Section V. Case Studies

Case Study A: Alpha Investment Services
Case Study B: Beta Widget Makers
Case Study C: Supply Chain Analysis
Case Study D: Sample Risk Assessment
Case Study E: Phased Pre-Positioning of Employees
Case Study F: Tabletop Exercise

Section VI. Additional Information

Glossary

Appendices

Appendix A: Organizational Functions
Appendix B: Disaster Assistance Plan
Appendix C: Building Fortification
Appendix D: Pandemic Outbreak Planning and Response
Appendix E: Emergency Operations Center (EOC)
Appendix F: Evacuation Procedures
Appendix G: Shelter-in-Place Procedures
Appendix H: Hurricane Preparation Steps
Appendix I: Tornado Preparation Steps
Appendix J: Severe Winter Storm Preparation Steps
Appendix K: DHS Advisory Code System
Appendix L: Assigning Actions by Department
Appendix M: National Weather Service Terms
Appendix N: Seismic Terms
